

# EMERGENCY CONVERSION PACKS

## For

- High-bays
- Panels & downlights
- Linear & bulkhead fittings

	Manual Test	Self Test	DALI Addressable Test
High bays	✓	✓	✗
Panels & downlights	✓	✓	✓
Linear & bulkheads	✓	✓	✗

All our emergency conversion packs are to be bought separately and can be held in stock and used on-site, to convert our fittings to emergency operation.

- **Plug-and-play simplicity.** Male/female connectors, no complex wiring, designed and manufactured to work with NVC fittings
- **7-year warranty,** batteries included
- **Complete with lithium batteries,** LED indicator lamp and any mounting brackets and hardware required
- **ICEL certified**

**LITHIUM**  
**NM3**

## HIGH BAYS

Our high-bay fittings (SATURN, JUPITER PRO & NEPTUNE) can all be converted to emergency operation, with manual or self-test, using one of our emergency conversion packs listed here.

ORDER CODE	POWER	LUMENS (lm)	EFFICACY (Lm/c.W)	MOUNTING	EMERGENCY
N/HB/NM3L/PACK	8	1319	165	Suspended	Manual-test
N/HB/STNM3L/PACK	8	1319	165	Suspended	Self-test

## A GREAT ALTERNATIVE TO TWINSPOTS

- **Much easier to install.** No additional wiring is required – the conversion pack uses the same wiring as the high-bay itself.
- **Better light distribution.** The conversion pack puts the light right on the floor, where it is needed.
- **Less glare.** Because the conversion packs shine straight down, not at a low angle, they cause less glare than twinspots.
- **Can be installed stand-alone** as a non-maintained emergency luminaire.

## PANELS & DOWNLIGHTS

All our LED panels and our commercial downlights can be converted to emergency operation with manual test, self-test or DALI addressable test, using one of our emergency conversion packs listed here.

ORDER CODE	MOUNTING	POWER	EMERGENCY
N/REC/M3/PACK/V2	RECESSED	2	Manual-test
N/REC/STM3/PACK/V2	RECESSED	2	Self-test
N/REC/DAM3/PACK	RECESSED	2	DALI addressable

## LINEAR & BULKHEAD FITTINGS

Non-corrosives and larger bulkheads can now be converted to emergency (manual test or self-test) with our conversion packs

Plug / socket connectors and colour coded wiring make this a simple procedure, so now there is no need to calculate precisely, in advance, just how many emergency fittings you need in a project. With a few of our conversion packs in stock you can convert the NVC fittings to emergency as you need them.

ORDER CODE	MOUNTING	POWER	EMERGENCY
N/LINEAR/M3L/CONV-PACK	INTERNAL	2	Manual-test
N/LINEAR/STM3L/CONV-PACK	INTERNAL	2	Self-test
